NASTY LITTLE SECRET REVEALED (HAVE YOU BEEN SHAFTED AND NOT EVEN KNOWN IT?)

Before you throw your clubs in the lake and give up the game of golf forever, let me say, it may not be you! The problem may be the clubs.

That's not possible you may think. After all, you spent all this time being fitted by the golf pro at the club who took your swing speed measurement, watched your swing and ball flight and recommended which flex was appropriate.

You went to the driving range on demo day and loved the clubs being shown. You even bought a whole new set with the new flex shaft and torque.

Are you sure that you got what you paid for?

Many of the well-known brands like Taylor Made and Calloway have been faked. Yes...faked!

Since July 2007, several arrests have been made for fake clubs being sold online. A father/son team in North Carolina was arrested for a counterfeit operation where more than a thousand packages each month of golf equipment were shipped around the world.

Only 2 years earlier, an undercover operation by **60 Minutes** found a shop in Donguan China selling counterfeit Callaway clubs, including the Great Big Bertha driver, irons, putters, golf bags and gloves.

Clues that the shaft is not what it seems:

Too stiff-

- The ball travels lower than expected from the given loft of the club
- The shot feels less solid due to vibrations up the shaft
- The ball fades right because the clubface is not squared at impact

Too flexible-

- The trajectory is too high for a specified loft
- The ball draws unexpectedly on impact

Stop the Frustration and Take it to the Next Level

Go to [Golfatthenextlevel.com](http://golfatthenextlevel.com)

Get our DVD **Ripped Off by Golf**. Visit behind the scenes of the golf business to show how you're not getting what you pay for at the golf store. Learn the truth from industry insiders as they expose the facts behind marketing hype and misleading ads. After viewing this for 75 minutes, you will be running to test your own equipment.

Yet, there's more!

Get **[Beyond the Basics-Understanding Golf Clubs](#)**

John Ford, a Master club maker addresses the problem-Are your clubs working for you or against you?

Watch this DVD and you will know more than most teaching pros. Certainly more than the guy behind the golf shop counter.

Never gamble on golf equipment again! View the 75-minute DVD. You'll be glad that you did.
